

VETERINARY SURGICAL PACKS

Canine Surgical Packs

Procedure-ready sterile packs for canine spay, neuter, soft-tissue and orthopedic surgery — everything on the table, nothing to count.

Overview

A surgical pack should let your team focus on the patient, not on assembling supplies. Our canine packs are assembled in a cleanroom, sterilized as a unit and sequenced in the order you use them: drape and gown on top, then gauze, instruments, blades and sutures.

Choose a standard configuration or work with us to build a custom procedure tray that matches your surgeons' preferences exactly — instrument brands, suture sizes, drape fenestration and gown sizing included.

Key features

- Spay/neuter, general soft-tissue and orthopedic configurations
- SMS fluid-resistant drapes and reinforced gowns
- X-ray detectable gauze sponges and laparotomy pads
- Stainless-steel instruments: hemostats, scissors, needle holders, spay hook, thumb forceps
- Scalpel blades, suture selection and towel clamps included
- Custom procedure trays built to your protocol

Specifications

Standard packs	Canine spay · Canine neuter · General soft-tissue · Orthopedic
Drape	SMS 45 gsm, fenestrated with adhesive, 100 × 150 cm
Instruments	Single-use stainless steel or reusable German-grade on request
Sterilization	Ethylene oxide, sterile 3 years
Packaging	Individual sterile wrap, 10 packs per case

Applications

- Ovariohysterectomy and orchiectomy
- Mass removal and laparotomy
- Orthopedic procedures
- High-volume shelter and community surgery programs
