

VETERINARY SURGICAL PACKS

Bovine Surgical & Obstetric Packs

Heavy-duty sterile packs for caesarean section, abomasal surgery, obstetrics and field procedures in cattle and other production animals.

Overview

Large-animal surgery demands robust instruments, generous drapes and sutures that hold under load. Our bovine packs are configured for the procedures that fill a food-animal practitioner's day — flank laparotomy for displaced abomasum, caesarean section, obstetrics and wound management — and are wrapped for use in the barn or the chute.

Because production-animal work is cost-sensitive, we offer packs at price points that make single-use sterility realistic on every call.

Key features

- C-section, laparotomy (DA), obstetric and general field configurations
- Heavy-duty SMS drapes, 150 × 240 cm, with adhesive
- Large-pattern instruments: Rochester-Carmalt, Mayo, Kelly, needle holders 8"
- Laparotomy pads, 4×4" gauze and towel clamps
- Heavy-gauge sutures (0, 1, 2) in absorbable and non-absorbable
- Obstetric sleeves and lubricant options in-pack

Specifications

Standard packs	Bovine C-section · Flank laparotomy · Obstetrics · General field
Drape	SMS 55 gsm, 150 × 240 cm
