

LABORATORY

Multi-Sample Blood Collection Needles

Draw several tubes from a single venipuncture — less handling, less stress for the patient, cleaner samples for the lab.

Overview

Multi-sample needles feature a second, rubber-sleeved needle at the rear that seals automatically between tubes, so you can fill a complete panel — EDTA, serum, heparin, citrate — without withdrawing from the vein. The result is one clean stick, minimal hemolysis and reliable results.

The double-ended design fits standard tube holders and works with every Vero Animal Health blood collection tube. A translucent hub lets you see the flash of blood on entry.

Key features

- Rubber-sleeved rear needle seals between tube changes
- Tri-bevel front needle for smooth venipuncture
- Translucent hub shows blood flash on entry
- Compatible with standard 13 mm and 16 mm tube holders
- Gauges 20G, 21G and 22G, lengths 1" and 1½"
- Sterile, single-use, individually packed

Specifications

Gauges	20G, 21G, 22G
Lengths	1" (25 mm), 1½" (38 mm)
Thread	Standard Luer/holder thread
Sterilization	Ethylene oxide (EO)
Packaging	Individual blister; 100 units per box

Applications

- Complete blood count and chemistry panels
- Pre-anesthetic bloodwork
- Wellness and senior screening
- Serial sampling in hospitalized patients
