

## ORAL CARE

# Oral Care Breath Spray

A quick spray between brushings that freshens breath and helps control the bacteria behind plaque and odour.

## Overview

Not every pet tolerates a toothbrush, and not every owner keeps up a daily routine. A breath spray is the easy alternative: a few pumps onto the gum line delivers zinc and natural antimicrobial actives that neutralize odour and reduce bacterial load, with no brushing required.

The formula is alcohol-free and xylitol-free, so it is safe for both dogs and cats, and the mint-parsley flavour is designed to be accepted rather than resisted.

## Key features

- Freshens breath in seconds
- Zinc gluconate and natural actives help reduce plaque bacteria
- Alcohol-free, xylitol-free, chlorhexidine-free
- Safe for dogs and cats — no rinsing
- Fine-mist pump reaches back molars
- Complements the Oral Care Dental Kit

## Specifications

|                     |                                                                     |
|---------------------|---------------------------------------------------------------------|
| <b>Volume</b>       | 120 mL pump spray                                                   |
