

ORAL CARE

Oral Care Dental Kit

Everything a pet owner needs to start a home dental routine: dual-ended brush, finger brush and enzymatic, pet-safe toothpaste.

Overview

By age three, most dogs and cats already show signs of periodontal disease — and daily brushing is the single most effective preventive step. Our dental kit makes it easy to recommend a complete routine at discharge: a long-handled dual-ended brush for larger dogs, a soft silicone finger brush for cats and puppies, and an enzymatic toothpaste in a flavour pets accept.

The toothpaste contains no fluoride, xylitol or foaming agents and is safe to swallow, so no rinsing is required.

Key features

- Dual-ended toothbrush with small and large heads
- Soft silicone finger brush for cats, puppies and small breeds
- Enzymatic toothpaste (glucose oxidase / lactoperoxidase) — poultry flavour
- Fluoride-free, xylitol-free, safe to swallow
- Helps reduce plaque, tartar and halitosis
- Retail-ready box with owner instructions

Specifications

Kit contents	1 dual-ended brush · 1 finger brush · 1 × 70 g enzymatic toothpaste
Toothpaste flavour	Poultry (beef and vanilla-mint on request)
Suitable for	Dogs and cats, all ages
Shelf life	24 months
Packaging	Retail box; 12 kits per case

Applications

- Daily home dental care
- Post-dental-cleaning maintenance
