

SYRINGES AND NEEDLES

Syringe and Needle Combination

Sterile, ready-to-use syringes with the needle already attached — fewer steps from the package to the patient.

Overview

Vero Animal Health Syringe and Needle Combinations pair a clear, precisely graduated syringe with a sharp, colour-coded hypodermic needle in a single sterile blister pack. There is nothing to assemble: open, draw up and inject.

Our standardized colour-coding system makes the needle size easy to identify at a glance, helping streamline preparation and minimize selection errors in busy clinical environments. Manufactured to rigorous quality standards, every combination is designed to deliver dependable fluid delivery, accurate dosing and smooth handling in routine, diagnostic and surgical applications.

Key features

- Needle Attached, Ready to Use — Syringe and needle come together in one sterile pack, saving preparation time and handling.
- Clear, Easy-to-Read Scale — Precise scale markings printed with indelible ink on a clear, transparent barrel.
- Medical-Grade Polypropylene — PP barrel and plunger for reliable performance and durability.
- Colour-Coded Needle Hub — Quick and accurate identification of the needle gauge.
- Sterile, Non-Toxic & Non-Pyrogenic — Manufactured and packaged for safe, single-use veterinary applications.
- Individual Sterile Blister Pack — Convenient handling and product integrity until the moment of use.
